*Full Stack Software Engineer specializing in React, Next.js, and TypeScript. Proven track record of building scalable web applications and reducing bounce rates by 40% through optimized UI/UX. Bilingual (English C1/German B1) and available for remote work worldwide.*

## WORK EXPERIENCE

### Tambora

FrontEnd Developer (Project Contract)

**Remote**

*Jul 2025 – Sept 2025*

- Led the critical migration from Legacy jQuery to React 19, achieving a 40% reduction in technical debt and modernizing the base architecture.
- Designed and implemented CI/CD pipelines that automated deployment, reducing delivery times by 80% and minimizing human errors in production.
- Developed a reusable UI component library (Design System) to standardize company products, accelerating the development of new features.

## FEATURED PROJECTS

### Koru

Modular Social Network (Personal Project)

[koru-livid.vercel.app](https://koru-livid.vercel.app)

*Full-Stack platform that integrates publishing spaces.*

- Authentication with Clerk Auth, secure session management, and user profiles with avatars.
- File upload and classification: documents, images.
- Stack: Next.js 16, Prisma ORM, TailwindCSS, shadcn/ui.
- Community and social interaction system.
